PROFESSIONAL SUMMARY

Full Stack Web Developer and Computer Science student with strong passion for building modern, responsive, and high-performance web applications.

Experienced in both frontend and backend development using **React.js**, **Node.js**, **Express.js**, and **MySQL**. I focus on writing clean, reusable code and building real-world projects that solve practical problems.

Currently improving my skills in **full-stack development**, **system design**, and **cybersecurity fundamentals**, with the goal of becoming a professional software engineer and remote developer.

Actively seeking remote opportunities and freelance projects in web development.

TECHNICAL SKILLS

Frontend Development

- HTML5, CSS3, JavaScript (ES6+)
- React.js
- Responsive Web Design (Mobile-first)
- UI/UX basics

Backend Development

- Node.js
- Express.js
- RESTful API development
- Authentication basics (JWT)

Database

- MySQL
- Basic database design & queries

Tools & Platforms

- Git & GitHub
- VS Code
- Postman
- Netlify / Vercel (deployment)

PROJECTS

Bedroom Rental System (Full Stack Project)

A full-stack room booking platform for managing and renting rooms.

- Built using React, Node.js, Express.js, and MySQL
- Users can search, view, and book rooms
- Admin can manage listings and bookings
- Fully responsive and modern UI design
- REST API integration between frontend and backend

University Website

A modern university information system frontend project.

- Built using React, HTML, CSS
- Responsive design for all devices
- Clean UI with structured sections (About, Courses, Contact)

Personal Portfolio Website

My professional developer portfolio showcasing my skills and projects.

- Built using React.js and Framer Motion
- Includes project showcase, skills section, and contact form
- Dark mode support and fully responsive design
- Deployed online for real-world access

EDUCATION

Bachelor of Science in Computer Science

(Current Student)

GOALS

- Become a professional Full Stack Developer
- Work remotely (Upwork, Fiverr, and freelance platforms)
- Master backend architecture and scalable systems
- Transition into Cybersecurity and Ethical Hacking

EXPERIENCE

Currently building real-world personal and academic projects to gain practical experience in full-stack web development and improve problem-solving skills.
